

Midwest Electric Products, Inc.

A/C GFCI Disconnects - A Winning Combo

Choose the disconnect contractors prefer most!

- NEMA-3R Weather-resistant, heavy galvanized steel enclosure resists corrosion and holds up year after year.
- Most models are UL & cUL listed and meet NEC code requiring GFCI receptacle near A/C disconnects
- Widest variety of single- and three-phase disconnects
- Midwest is FIRST to introduce a Three-Phase GFCI Combo!

Figure Your Savings by Using Midwest Electric on Your Next Job:

MIDWEST

Midwest Electric Products, Inc.

SPA PANEL - Meet Your Demands for Affordable Luxury

In addition to Midwest's comprehensive line of air conditioning disconnects, we also have Spa Panels to complete our Disconnect line. These GFI disconnects provide a convenient low-cost means to satisfy NEC requirements for a GFI disconnect for spas, hot tubs, water heaters and swimming pools. The NEMA 3R design insures safe, weather-tight installation for residential and even some light commercial applications. Now, more than ever, Midwest can boast the broadest product offering in disconnects. Whether it's metal or plastic, fused or nonfused, single phase or three phase, or with GFI protection, Midwest is your best choice for quality disconnects.

Midwest Electric's Spa Panels are most preferred because:

- The NEMA-3R Weather-resistant, heavy galvanized steel enclosure resists corrosion and holds up year after year.
- Units are rated 125 Amps
- All terminals accept copper or aluminum wire for added installation flexibility
- Door has padlock provision to prevent unauthorized access
- Includes over current protection as well as GFI protection
- The 4-circuit load center allows for additional circuit breaker spaces available in each model - great for landscape lighting!
-  LISTED and meets NEC code
