

Midwest Recreational Vehicle Park Equipment

The total RV park power package

The power for RVs

RV Metallic (*All metal*)

With proven strength and reliability, Midwest's traditional metallic units give park managers and their customers the power, security and features needed for a successful stay.

Rugged and reliable

- Heavy galvanized steel with electro-deposited finish delivers excellent corrosion protection
- NEMA 3R enclosure provides long outdoor life
- Continuous duty meter socket comes with utility-accepted meter sealing
- Illuminated units feature easily replaceable 7W lamps

Safe and sure

- Deadfront prevents accidental contact with live parts
- Rolled edge door for cord protection
- Padlockable door deters unauthorized access
- UL Listed (consult manufacturer's representative for CUL)

Versatile in application

- Wide range of receptacle configurations adapt to your needs
- Terminals accept copper or aluminum wire for added flexibility
- Single or double sided pedestal models or surface mount
- Metered, unmetered, lighted and TV/telephone are available
- Custom finishes available for special requirements

Easy to install

- Complete factory assembly and wiring reduce installation time
- Removable door simplifies installation
- Broad range of knockouts accommodate varied wiring needs
- All units come with Cu Al equipment ground lug

Parkmate™ (*Galvanized or stainless metal post, non-metallic head*)

Parkmate power centers deliver the latest in technology and design, functionality and aesthetics. Engineered thermoplastic enclosures and corrosion-resistant components ensure long life and low-maintenance operation.

Tough and ready

- Valox® head enclosures resist corrosion and provide long, maintenance free-service
- Tan powder-spray coated surface holds up to the elements
- UL Listed (consult manufacturer's representative for CUL)

Protected and connected

- Hinged cover closes over plugs and cords, maintaining a safe, weather tight enclosure
- Photoelectric sensor automatically turns light on and off
- Cover features a positive latch with padlocking provisions

Options for every need

- Choose light, photoelectric sensor, telephone, cable and electric metering
- Wide range of receptacle configurations adapt to your needs
- Fluorescent light shows the way for night-time location and connection
- Single or double sided pedestal models or surface mount
- Custom finishes available for special requirements
- Optional wireless remote meter reading

Speedy installation

- Easy to wire terminal lugs make installation fast and sure
- Telephone and cable jack accessory kits mount easily in power center for a neat, uncluttered look
- Optional loop feed lug kit available for Parkmate head

Parkranger™ (*All non-metallic*)

Parkranger power pedestals combine all the favorite features of traditional pedestals with the advanced technology and benefits of non-metallic units.

Hard-working, long-lasting

- Weather-resistant Valox® thermoplastic enclosure protects against the elements
- Corrosion-resistant internal components deliver long, reliable life
- Ambient compensated thermal magnetic circuit breaker ensures accurate trip protection
- Base module comes with loop feed terminal bar

Great looks, easy use

- Clean, crisp lines enhance park appearance
- Prismatic lens on lighted versions minimizes glare and maximizes illumination
- Custom finishes available for special requirements

Many choices for many purposes

- Individual site metering allows you to recover electrical costs
- Power, water, cable and telephone access options create a complete package
- Single or double-sided pedestal models
- Optional wireless remote meter reading

Installs fast, lasts long

- Factory assembly and wiring minimizes on-site installation time and expense
- Available advance shipping of bases facilitates rough wiring and plumbing
- Low maintenance requirements keep lifetime costs low
- Oversize access panel simplifies installation, upgrading and meter reading

The power of the package

The Midwest power units on the front line of your RV park electrical system depend on equally reliable distribution equipment. For this, Midwest partners with GE. A full line of GE transformers, switchboards and panelboards ensures the you get exactly what needed for a specific park's operations.

Transformers

Before it leaves the factory, every GE transformer must pass tests, performed with advanced equipment, on a range of measurements. That includes the test requiring it to be the quietest of its type that GE has ever built. That's why you can be sure you'll get the highest initial quality and years of trouble-free operation. And why we've doubled the length of our previous one-year warranty.

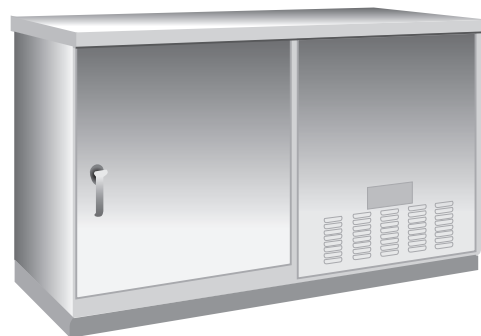

Panelboards

From design through manufacture and delivery, GE commits its considerable resources to giving our panelboard customers the products they need, when they need them. The choices include A-Series® II and Spectra Series panelboards and powerpanels. All of them meet all the latest standards for safety and performance.

Switchboards

Spectra Series® Switchboards offer a state-of-the-art design that provides the high quality, safety and reliability long associated with GE group-mounted switchboards. They are designed and manufactured to meet the stringent GE internal standards along with NEMA, NEC, UL and cUL requirements.

RV Substations

Midwest Electric's RV substations provide a safe, economical way to deliver power to power centers and power pedestals. The substations consist of a core and coil dry-type transformer (15-300kVA) and a distribution panelboard in a common low-profile NEMA 3R enclosure.

Midwest: The standard of excellence

For more than 50 years, RV parks have turned to Midwest for versatile, reliable power products, and we have delivered. Today, you'll find more choices and more advanced capabilities than ever. But the quality – the safety features, rugged construction, weather protection, versatility, attractiveness – remains.

Choose the standard of excellence. Contact your Midwest distributor or sales representative, or visit www.midwestelectric.com
